Packaging	Box of 20 x 45g jellies

• Another result of Enervit's experience: PRE SPORT, a carbo loader food with innovative features that can be taken up to 30 minutes before starting activity. • Enervit PRE SPORT is a brand new product. Its low-glycemic index promotes utilization of body fat as the main energy source and prolongs availability of carbohydrate-derived energy. As a result energy stores last longer. • It does not contain any fats, which makes for quicker assimilation and easy digestibility. • Its exclusive orange-flavoured jelly formulation makes Enervit PRE SPORT particularly tasty: satisfying your palate without weighing you down.
